DATE MAILED: 08/01/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/865,691

Applicant(s)

FUKUMOTO ET AL.

Examiner

Houshang Safaipoor

Art Unit

2622

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 May 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-9 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received. /

DETAILED ACTION

Response to Arguments

Applicant's amendment filed on May 11, 2005 has been entered and made of record.

Applicant's arguments with regards to claim 1 have been considered, but are moot in view of the new grounds of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyakawa (U.S. Patent No. 4,974,098).

Regarding claim 1, Miyakawa et al. discloses an image reading apparatus comprising:

a light source (5) for generating light directed toward a linear image reading (10) that has a first length (fig. 2);

a plurality of light-receiving elements (10) that output image signals corresponding to received light (fig. 2);

an array of lenses that focuses light onto the light-receiving elements (fig. 2). Miyakawa, does not show or define the length of the lens being greater than the length of the image reading region, however, he introduces a glass plate (4) for covering the original (1) and the glass plate has a length greater than the image reading region. In addition, applicant has not addressed any advantages of having the lenses length being greater than the image reading region. Applicant

Art Unit: 2622

argues that the shielded elements are outside of the image reading region for not receiving any reflected lights. Miakawa has the light receiving elements at the extremity shielded and outside the placement region and discloses that lens 2 can be adjusted (col. 1, lines 52-66); and

a light-shielding member (12 and 13);

wherein all of the light-receiving elements are arranged in a single line having an extremity, the light-shielding member covering at least one light-receiving element disposed at the extremity outside the first length (fig. 2, col. 1, lines 34-58 and col. 3, lines 35-52).

Regarding claim 2, Miakawa et al. discloses The apparatus according to claim 1, wherein remaining light-receiving elements (11) other than the covered light-receiving element or elements are exposed (fig. 2).

Regarding claim 3, Miakawa et al. does not explicitly disclose the apparatus according to claim 1, wherein the covered light-receiving element is arranged to avoid direct facing to an object to be read out (col. 1, line 34-58) and col. 3, lines 35-52).

Regarding claim 7, Miakawa et al. discloses The apparatus according to claim 1, further comprising a semiconductor chip in which the plurality of light-receiving elements are built in (col. 1, lines 5-18).

Regarding claim 8, Miakawa et al. discloses The apparatus according to claim 7, wherein the light-shielding member covers a part of the semiconductor chip in addition to said one light-receiving element disposed at the extremity (fig. 2).

Regarding claim 9, Miakawa et al. discloses The apparatus according to claim 7, further comprising an additional semiconductor chip in which a plurality of identical light-receiving elements are built in, wherein all of the identical light-receiving elements are exposed (fig. 2).

Art Unit: 2622

Regarding claims 4-6 covering and shielding the light receiving elements with different materials and techniques are well known and routinely implemented in the art.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Contact Information

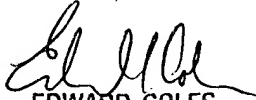

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Houshang Safaipoor whose telephone number is (571)272-7412. The examiner can normally be reached on Mon.-Thurs. from 6:30am to 5:00pm.

Art Unit: 2622

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward L. Coles, Sr. can be reached on (571)272-7402. The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
